

Contributing to UDP Server Manager

Thank you for your interest in contributing!

How to Contribute

- Fork the repository and create a feature branch.
- Follow the per-device modular structure (see [core/workers/](#)).
- Write clear, maintainable code and document new features.
- Add or update tests if applicable.
- Submit a pull request with a clear description of your changes.

Coding Standards

- Use Python 3.8+ and follow PEP8 style guidelines.
- Keep device logic isolated in its own subfolder.
- Use robust error handling and logging.

Documentation

- Update [README.md](#) and relevant docs for any user-facing or architectural changes.

Reporting Issues

- Use the issue tracker to report bugs or request features.
- Provide as much detail as possible for reproducibility.

See [architecture.md](#) for design details and [usage.md](#) for user instructions.

Advanced Markdown Features

- ☒ Tables
- ☒ Task Lists
- ☒ Syntax-highlighted code blocks
- ☒ Mermaid diagrams
- ☒ Footnotes
- ☒ Images
- ☒ Links
- ☒ Blockquotes
- ☒ Math (KaTeX/LaTeX)

See [markdown_features_demo.md](#) for examples.
